PERSONAL PROFILE

I'm a game development student from Spain with a strong passion for video games and interactive experiences. I'm highly motivated, self-taught in many areas, and eager to grow within the industry through hands-on projects and teamwork.

PROJECTS

HORROR EXPERIENCE

This project was my own take on the horror genre. I modeled and textured all assets in Blender, and implemented them in Unity 3D using the terrain editor. I also created custom particle systems to generate fog and designed a teleportation system to simulate an infinite forest.

You can see this project in detail in my portfolio.

SKILLS

SOFT SKILLS

- Teamwork
- Communication
- Problem-solving.
- Time Management

TECHNICAL SKILLS

- **Programming Languages:** C++, C#, Python, HTML, CSS, JavaScript (basic).
- **Game Engines:** Unity 3D, Unreal Engine (basic).
